

THE DIAMOND TEAM – BNB BANK ROLL

### Guide:

The My Diamond Team BNB Bank Roll Project is a decentralized community support fund built on the BSC blockchain and implementing smart contract technology.

The My Diamond Team Smart Contract uses this technology to help participants reach financial independence.

When a participant deposits BNB into the system, that contribution supports the community. This activates the contract code which supports that contributor in turn.

This is a 100% decentralized and community-based project, meaning that there are no guarantees and no additional sources of funding within the project; it is supported by all members for the benefit of the financial advancement of the community as a whole.

In short, you support others, and others support you back.

My Diamond Team can be viewed as a decentralized third party which insures fairness, transparency, and financial benefit for all according to a carefully constructed algorithm.

It is the most reasonable, safest, and best cutting-edge financial SUPPORT model available currently.

### How To Start:

You can participate in the My Diamond Team Project by depositing a minimum of 0.1 BNB to the Fund, at which time you become eligible to receive 365% back.

The 365% can be returned in four possible ways (one passive and three via marketing/invites), and when the full 365% is accumulated through any combination of these four ways, it will be necessary to reinvest or make new deposits if you wish to increase your potential income and continue receiving rewards through the protocol.

1. 1.5% Daily return on your Deposit, 100% Passive.
2. 5% Direct Referral Commission for Sharing and Growing the Community Fund.
3. Matching Commission on Daily Income for your referrals and their downline (to 15 levels) every time they make a WITHDRAWAL.

Level 1 - 5 = 10% commission per downline withdrawal.

Level 6 to 10 = 7% commission per downline withdrawal.

Level 11 to 15 = 5% commission per downline withdrawal.

\* One new level is activated for each initial activated referral further downline, with a maximum 15 levels as shown above.

4. Daily Top Referrer Pool: 3% of ALL Deposits are set aside in this pool, and every 24 hours 7% of the pool is shared among the top four sponsors (based on total amount of BNB deposited by their direct referrals).

Pool Distribution: Top 1 - 2.5%, Top 2 - 2.0%, Top 3 - 1.5%, Top 4 - 1.0%

5. 10% fee for investing and withdrawing. Additional Anti Whale Taxes for withdrawing see 'Anti Whale Withdrawal Taxes'. Tax for investing is paid by the contract balance. Your Deposit stays 1:1. Tax for withdrawing is paid from your withdrawable amount. You receive 90% of the withdrawable amount.

6. Minimum deposit to join is 0.1 BNB and a maximum of 25 BNB total deposit per wallet is also implemented as an anti-whale measure.

7. Users can withdraw their payout as often as every day. It is cumulative; once 24 hours have passed, you will receive a total of 1.5% in rewards.

8. Users are given the option to Re-invest/Compound, so they do not have to withdraw their daily earnings and deposit them again in separate transactions, incurring unnecessary gas fees. In addition, at the time of reinvesting a 5% bonus is added to the amount of unwithdrawn income being compounded as an incentive to continue building the value of the project.

9. Airdrops: Users can send any amount of BNB from their wallet to users in their team or to any individual member of MDT.

10. Team: The first time someone uses an investor's referral link, a new team will be created with the initial investor as the team owner and their referral as a team member. From that point, any direct referrals by this initial investor become additional team members.. Upon creation of the team, the team name can be customized. There is no maximum number of members in a team.

11. Nicknames: By going to Settings, a user can assign themselves a nickname which will then be used in place of their wallet address in the referral link. This measure preserves privacy for investors who do not feel comfortable revealing their addresses.

### Anti-Whale Withdrawal Taxes:

Withdrawal taxes in the project are scaled based on the amount of the withdrawal compared to the total amount of the contract balance.

See breakdown of fees below:

- 0% tax additional if amount is < 1% of contract balance
- 5% additional tax if amount is >= 1% of contract balance
- 10% additional tax if amount is >= 2% of contract balance
- 15% additional tax if amount is >= 3% of contract balance
- 20% additional tax if amount is >= 4% of contract balance
- 25% additional tax if amount is >= 5% of contract balance
- 30% additional tax if amount is >= 6% of contract balance
- 35% additional tax if amount is >= 7% of contract balance
- 40% additional tax if amount is >= 8% of contract balance
- 45% additional tax if amount is >= 9% of contract balance
- 50% additional tax if amount is >= 10% of contract balance

### Important Notes:

- \* This project is the latest release of My Defi Team.
- \* My Diamond Team is a community-based project, 100% decentralized, P2P transactions through Smart Contract.
- \* Each Deposit Cycle is 365%.
- \* When 365% is received, the user will need to make a new deposit in order to increase their max payout and continue earning passively.
- \* The minimum investment is 0.1 BNB. The project is open to all participants with no restrictions.
- \* The default address of the primary sponsor is "0xfDC01397731d3280bBB5e2A136381297962C87d2". All funds will be directed here and used to further grow the project.
- \* No referrals are required to receive the 1.5% daily payout. This income is 100% passive. Referrals will just help the investor reach the 365% goal.
- \* Increase the speed of your returns by growing the community fund through marketing / sharing of the project.
